and Kim, M. Y.

Langley Research Center

Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. An analysis of the radiation hazards in support of NASA deep space exploration activities is presented. The emphasis is on materials required for radiation protection shielding. Aluminum has been found to be a poor shield material when dose equivalent is used with exposure limits for low Earth orbit (LEO) as a guide for shield requirements. Because the radiation issues are cost related-the parasitic shield mass has high...
